---

PROFESSIONAL SUMMARY

Results-oriented Senior Full Stack Engineer with 5+ years of professional software development experience architecting scalable distributed systems and high-traffic payment intelligence platforms. Proven track record leading agile engineering squads, building resilient Python (FastAPI/Django) microservices, and crafting reactive TypeScript web applications.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Bash

Frameworks: FastAPI, Django, React, Next.js, Node.js, Express

Databases & Cache: PostgreSQL, Redis, MongoDB, MySQL

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Kubernetes, CI/CD (GitHub Actions), Kafka

Practices: REST API Design, Microservices, Agile/Scrum, Unit Testing (Pytest, Jest)

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer — Clip Financial Technologies

2022 – Present (2 years)

- Architected high-throughput payment processing APIs in Python (FastAPI) handling 1.2M daily transactions with 99.99% uptime.
- Engineered real-time merchant analytics dashboard in React with TypeScript and Redis pub/sub streaming.
- Containerized 12 microservices using Docker and orchestrated automated zero-downtime CI/CD deployments on AWS with GitHub Actions.
- Mentored 4 software engineers, conducted code reviews, and championed Test-Driven Development (TDD).

Software Engineer — Konfio Enterprise Solutions

2019 – 2022 (3 years)

- Developed core loan underwriting service using Django REST Framework and PostgreSQL database clustering.
- Constructed reusable React component UI design system adopted across 3 core product teams.
- Integrated OAuth2, JWT authentication, and Open Banking APIs under strict SOC2 compliance standards.

EDUCATION

Bachelor of Science in Software Engineering — National Autonomous University (UNAM), 2019
