---

PROFESSIONAL SUMMARY

Full Stack Engineer with 5+ years experience building cloud-native SaaS platforms. Specialized in React TypeScript frontends, FastAPI and Node.js microservices, PostgreSQL relational storage, and AWS containerization.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML5/CSS3

Frameworks: React, FastAPI, Django, Express.js, GraphQL

Cloud & Data: AWS (S3, RDS, EC2), PostgreSQL, Redis, Docker, Kubernetes, Git, CI/CD

PROFESSIONAL EXPERIENCE

Full Stack Engineer — Stratum Intelligence

2021 – Present (3 years)

- Developed customer-facing dashboard in React and TypeScript with real-time WebSocket telemetry.
- Created Python FastAPI backend microservices connected to PostgreSQL databases and Redis cache layer.
- Automated end-to-end container builds and deployments to AWS using Docker and GitHub Actions.

Software Developer — Vanguard Web Labs

2019 – 2021 (2 years)

- Implemented responsive UI components using React, Redux, and Tailwind CSS.
- Built RESTful API endpoints in Django and integrated third-party payment gateways.

EDUCATION

Bachelor of Science in Computer Science — Imperial College London, 2019
